WORK EXPERIENCE

Software Developer | Full-time

Jul 2024 - Present

Genpact

Hybrid • Noida

- Developed 15+ **workflow automations** across **ServiceNow** and **Esker**, streamlining enterprise processes and reducing manual effort.
- Built and maintained 10+ **REST API integrations**, enabling seamless data synchronization across enterprise platforms.
- Designed **AI-powered automation workflows** using **n8n**, **LLMs**, and **enterprise APIs** for document processing, knowledge retrieval, and workflow automation.
- Developed reusable **Business Rules**, **Script Includes**, and **automation components**, improving platform maintainability and accelerating feature delivery.

Technologies : ServiceNow, Esker, JavaScript, Python, REST APIs, SQL, n8n, LLMs

PROJECTS

NEXUS | Vercel Github

- Built NEXUS, an autonomous **multi-agent AI research and knowledge synthesis platform** that searches, analyzes, critiques, and generates citation-backed reports.
 - Developed a **LangChain-based agent orchestration framework** combining search, retrieval, writing, and evaluation agents for automated research workflows.
 - Implemented **Retrieval-Augmented Generation (RAG)** using **Tavily AI** and web content extraction to ground responses in real-time information sources.
 - Engineered an end-to-end **agentic workflow** capable of collecting, validating, and synthesizing information from multiple sources into structured reports.
 - Enabled **real-time streaming responses** with **FastAPI**, delivering an interactive ChatGPT-like experience with live report generation.
 - Integrated **Groq LLMs**, **Gemini**, and multimodal processing capabilities for high-speed inference and analysis of web, document, and image inputs.
- Technologies / Tools Used** : Python, FastAPI, LangChain, Groq, Gemini, Tavily AI

ExamArchitect | Vercel Github

- Built ExamArchitect, an **AI-powered exam analytics platform** for analyzing historical exam questions and identifying study patterns.
 - Developed an **AI-powered PDF ingestion pipeline** using **Gemini 2.5 Flash** to extract, classify, and structure questions from scanned and digital exam papers.
 - Processed **1000+ historical exam questions**, transforming unstructured documents into searchable and analyzable datasets.
 - Designed a prediction engine leveraging **frequency analysis**, **recency weighting**, and **difficulty trends** to identify high-priority topics for exam preparation.
 - Developed interactive analytics dashboards featuring **heatmaps**, question explorers, and personalized study planners for data-driven learning.
 - Integrated **LLM-powered insights** to generate study recommendations and optimize preparation strategies.
- Technologies / Tools Used** : React, FastAPI, PostgreSQL, Gemini 2.5 Flash

SKILLS

Programming Languages :	C++, Java, Python, JavaScript
Gen Ai :	LLMs, RAG, LangChain, AI Agents, Pinecone, Prompt Engineering, AI Workflow Automation
Frameworks & Libraries :	React, Next.js, Express, FastAPI, Tailwind CSS
Databases :	PostgreSQL, MySQL, MongoDB
Tools & Platforms :	Git, GitHub, n8n, Docker, Vercel, Render
ServiceNow :	ITSM, Flow Designer, IntegrationHub, Script Includes, UI Policies

EDUCATION

Jaipur Engineering College and Research Centre, Jaipur, Rajasthan | Jaipur

Sep 2020 - Jul 2024

B.Tech CSE

CGPA : 9.13

OPEN SOURCE CONTRIBUTIONS

- [Microsoft VS Code](#) – Merged contribution improving the editor after addressing maintainer review comments.
- [Career-Ops](#) – Developed features across JavaScript and Go, including path resolution, testing, and documentation improvements.

ACHIEVEMENTS

- Smart India Hackathon 2022** – Runner-up (20,000+ participants)
- LeetCode Knight** (1900+ rating)
- CodeChef 3rd** (Ranks: 75, 114)
- Open Source Contributor** – 5 merged pull requests across community-driven projects, including Career-Ops.
- CodeKaze** – College Rank 10
